HOW TO GET STARTED

1. Connect the transformer to the main unit and plug into an electric socket in your property.

2. Insert batteries (4×AAA alkaline) not included

3. Connect telephone lead to the unit and to the telephone socket in your property.

4. Push switch to "On" position

ON
OFF

Telephone wall outlet

OPERATION

1. The HA28 is supplied with two remote handsets. Pleas note the remote handsets are pre-set at the factory and are ready to use once your personal message and telephone numbers have been stored.

2. Switch the unit "ON" the red led light will flash for 3 seconds. Once the red led light stops flashing you can record your message and store upto 3 telephone number

3. The remote control can operate the main unit at a distance of 30 meters.

Note: If the unit is turned "OFF" your recorded message and stored telephone numbers will not be deleted.

STORE TELEPHONE NUMBER

In standby mode, input the auto-dial numbers as following:

1st set:
[C/*] + [1] + phone number + [C/*] "1xxxxxxxxx"

2nd set:
[C/*] + [2] + phone number + [C/*] "2xxxxxxxxx"

3rd set:
[C/*] + [3] + phone number + [C/*] "3xxxxxxxxx"

*For a PABX/PBX system add a '9' before the area code
If you make a mistake just repeat the process above

RECORD

Press both [/] and [#], the red indicator is on. Record the message for 6 seconds. When the red light is off, record time is up.
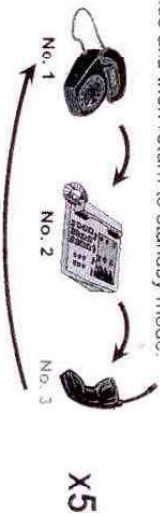

Suggested message : THIS IS THE "JONES" RESIDENCE PLEASE CALL FOR ASSISTANCE. PLEASE PRESS ANY OF THE NUMBERED BUTTONS ON YOUR TELEPHONE KEY-PAD AND THIS WILL OPEN THE TWO WAY COMMUNICATION.

Press [▼] button to play back the message.

ASK FOR HELP

Press the button on the remote handset or the " ● " button on the main unit. The main unit will automatically dial the 3 × preset telephone numbers for a period of 45 seconds.
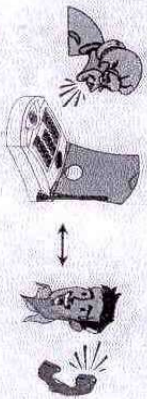

1. If the call receiver does not answer the phone, the unit will continue to dial the 3 × preset numbers for a period of 5 cycles and then return to standby mode.

No.1 No.2 No.3 x5

2. When the receiver answers the call from the HA28 they will hear a pre-recorded message. The receiver of the call can then open up a two communication line and listen into the callers properly by pushing one of the numbered buttons on their telephone key-pad. As the main unit (HA28) is hands free it is possible to communicate with the caller to a maximum distance of 3 metres. Once the receiver of the call from the HA28 has opened up the two way communication line after approximately 45 seconds they will hear 3 beeps this is to indicate that the two way communication is about to end. In order to extend the talk/listen time for a further 60 seconds the receiver of the call needs to press one of the key-pad buttons on their phone after hearing the 3 beeps. Once the conversation is over the unit will then return to standby mode
PLEASE NOTE.
The unit will continue to dial the stored telephone numbers if you do not open the two way communication line by pushing one of the numbered buttons on the receivers telephone key-pad.

INDICATORS

When the Red LED of main unit is illuminated, the back up battery is low.

Power supply

Remote :   A23S battery
